

# MAYFAIR DIAGNOSTICS

## CHIROPRACTIC REFERRALS

June 2024

Mayfair welcomes referrals from chiropractors to order conventional, investigative diagnostic imaging in support of a differential diagnosis.

**The College of Chiropractors of Alberta allows insured in-scope\* ordering at our community clinics which includes:**

- Walk-in **X-ray**
- **MSK and DVT ultrasounds** only. (Does NOT include abdominal, breast, pelvic, obstetric, general, and vascular ultrasounds.)
- Please note that X-ray and ultrasound exams are performed according to **standard Mayfair protocols**, which may involve a combination of related body parts or exams to ensure a thorough and complete exam.
  - **Chiropractors must identify which images are NOT required during imaging.** For example, routine C-spine protocol at Mayfair includes AP, lateral, odontoid, and both obliques. For a limited study, you must request C-spine – no obliques.
- **Pain management pre-assessment services** can be requested for patients needing injections (e.g., cervical, thoracic, and lumbar spine regions). Simply check the “For Pre-Injection Assessment” box on the Pain Management Requisition Form.
  - This may include the provision of a treatment plan, pain management options, and physician-directed imaging.
- **Nuclear medicine imaging**, excluding HIDA (gall bladder function) tests.
- **Private MRI and CT services** will be offered on a “patient pay” basis with a referral.

*\*Please note that in-scope ordering does NOT include bone mineral densitometry, echocardiography, exercise stress testing, and mammography.*

**If you have any questions, please email [BD@radiology.ca](mailto:BD@radiology.ca) and one of the team members will contact you.**

**Mayfair has updated our requisition forms to reflect our services.  
To receive new requisitions or update your EMR:**

- Email [BD@radiology.ca](mailto:BD@radiology.ca)
- Download at [radiology.ca/requisition-forms](http://radiology.ca/requisition-forms)
