

## MAYFAIR DIAGNOSTICS

# REGINA NEW SERVICES

### Diagnostic Mammography and Breast Ultrasound

Mayfair Diagnostics Regina will be introducing **digital breast tomosynthesis (3D mammography)** starting July 2, 2024. Our leading-edge technology uses low dose X-rays to capture detailed images of breast tissue by rotating in an arc to capture multiple images from many different angles. The computer then processes them to create a 3D image of the breast.

Evidence suggests that digital breast tomosynthesis is better able to detect smaller breast cancers with more accuracy and fewer false positives.

**Breast density information will be included in the report.**

#### Diagnostic Mammography Referral:

- Must be referred by a physician.
- Requisitions must be faxed to the Regina clinic at (306) 569-3337.
- Diagnostic criteria can include:
  - Abnormality on a previous mammogram
  - Breast health concern
  - Breast lumps
  - Breast pain
  - Discharge
  - Family history
  - New nipple inversion
  - New pain/problem
  - Previous breast cancer diagnosis
  - Skin changes
  - Unexpected changes

#### Diagnostic breast ultrasound will also be available starting July 2, 2024.

- Must be referred by a physician.
- Requisitions must be faxed to the Regina Clinic at (306) 569-3337.
- Mayfair Regina will make every effort to book the mammogram and breast ultrasound at the same time, but this will depend on availability.
